

What are classification keys?

1. Think of a group of plants or animals and see if you can complete the **classification key** below to sort them out.
2. **Ask yourself a question** to narrow down your choice to **one** and leave all the others in a group.
3. **Ask yourself a second question** to narrow down your choice to another one.
4. Keep on doing this until you only have **one choice left**.
