

Jobs

Hi. How are you? I'm Rafa, and I want to work as a...

I don't know! I don't know what job I want when I finish my studies!

I like science, so I could work as an engineer.

Or be a teacher.

There are so many options, I've found a questionnaire to help me decide.

It's like an interview.

Ok, let's see how it goes.

First question. What experience do you have?

Last summer I worked as a lifeguard. My timetable was from 9 to 5 with an hour for lunch.

I had to work five days a week.

I liked it a lot.

I liked the idea of being able to save lives but I need to get more experience.

Second question. What's more important to you – to earn a lot of money, help people or travel a lot?

For me, money or salary is important, but I also like to take care of people.

I'd love to travel abroad but it's less important to me.

Third question. What's more important to you – to work as part of a team or have your own business?

I'd like to be part of a team. I think it would be more fun.

Fourth question. Would you like to work with new technologies?

Hmmm, well. It's not the most important thing for me, but I don't hate it either.

Fifth question. Would you prefer to work with people or animals?

I think I'd like to work with people more than with animals because I'm allergic.

Sixth question. What do you find more interesting – science or the arts?

Without a doubt, for me science is more interesting because I like practical things more.

Ok, we've finished. And the answer is...

Jobs

Doctor!

Hmm, yes, I could be a doctor.

Although I'd have to study a lot to achieve it.

I should start right now!

Well, I don't know yet, but the questionnaire has given me something to think about.

Ok, bye. Wish me luck. Bye!
