

### **Activity 1 – Identifying angles**

1: A and F are acute;

B and D are obtuse;

C and E are right angles.

2: A is a right angle;

B is acute;

C is acute;

D is obtuse;

E is a right angle;

F is obtuse.

3: There are different answers to this question. If you keep the point of the angle on the same peg, there are more acute than obtuse angles possible.
