

Asteroids, comets, supernovas and stars

1. **Cut out** the pictures and descriptions below.
2. Now **match the description** to its **relevant picture**.

Asteroids

Comets

Stars

Supernovas

a giant ball of glowing gas that shines brightly in the sky.

a big ball of ice, dust, and rocks that orbit the sun, known for their tails.

a giant explosion that happens when a star dies.

a rocky object that orbits the Sun, sometimes called “space rocks”.
