

Adding fractions and mixed numbers worksheet 2

answers:

1. $2 + 1 = 3$

$$\frac{1}{4} = \frac{2}{8}$$

$$\frac{1}{4} + \frac{3}{8} = \frac{2}{8} + \frac{3}{8} = \frac{5}{8}$$

Olivia walks $3\frac{5}{8}$ km in total.

2. 1.: $3 + 2 = 5$

$$\frac{3}{5} = \frac{6}{10}$$

$$\frac{3}{5} + \frac{9}{10} = \frac{6}{10} + \frac{9}{10} = \frac{15}{10} = 1\frac{1}{2}$$

$$\text{So, } 3\frac{3}{5} + 2\frac{9}{10} = 6\frac{1}{2}$$
