

Glorious green plants

Plants are **glorious!** And they're everywhere!

Lush grass and **fragrant** flowers. You might find those in a garden or park

Crunchy vegetables and **juicy** fruit are plants we eat.

Some grow **underground** like potatoes and carrots.

Others at the top of **tremendously** tall trees. Like apples and pears.

Even tree's come in many shapes and sizes. From **prickly** bushes with **big wide leaves**

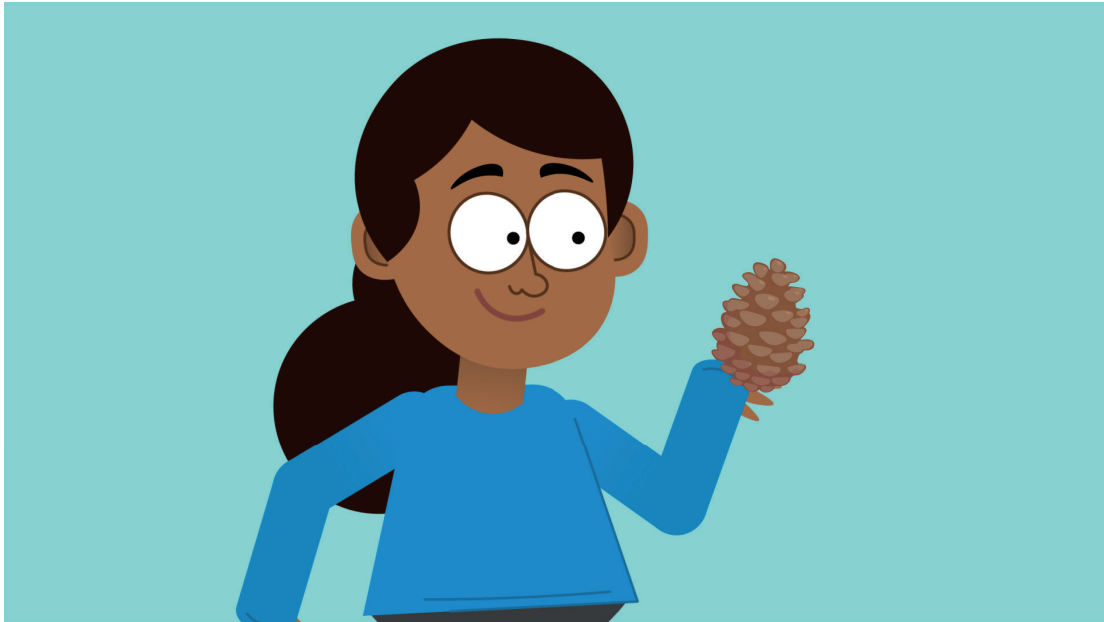

To **towering** pine trees with their sturdy **trunks**.

They stay green all year round because they're **evergreen**.

And they drop pine cones that are full of **seeds**.

With a little water and sunlight, the seeds will grow into more plants!
