## Think together

## (1) How many are there?

It's difficult to fit all these jumps on the number line.

I think I could count the ones all in one go.

2 How many are there?
$1010101010 \quad 10 \quad 10$

There are

3 Find the mistakes.
There are 67 sweets in total.
a)

## 

b)

c)

I think there is a number missing from the number track.

I think there is a mistake in each one.
