

Tremendous teeth

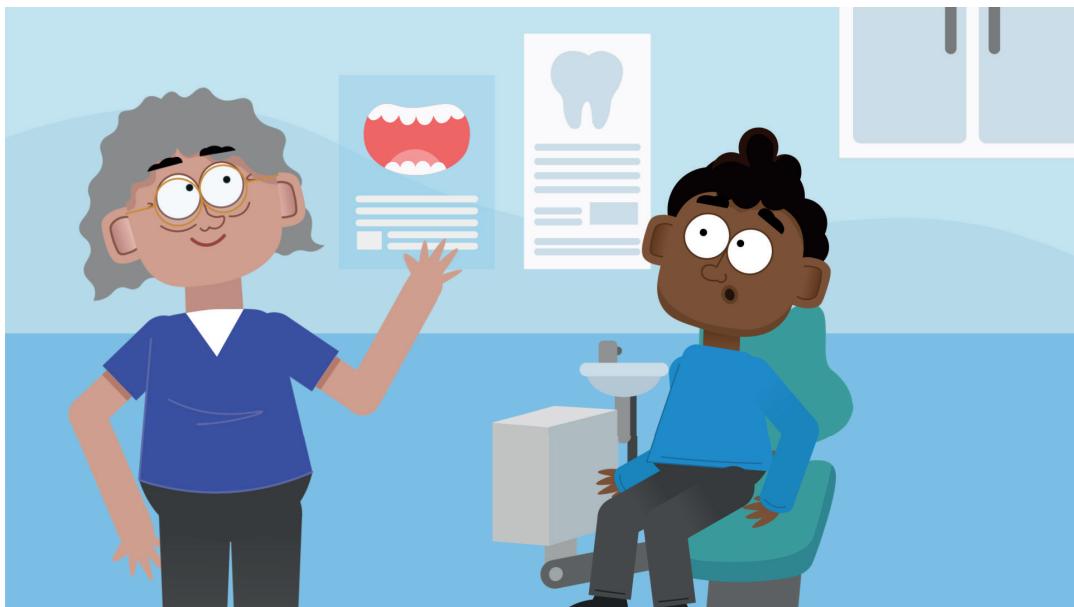

Our **tremendous teeth** allow us to **chew** our way through food.

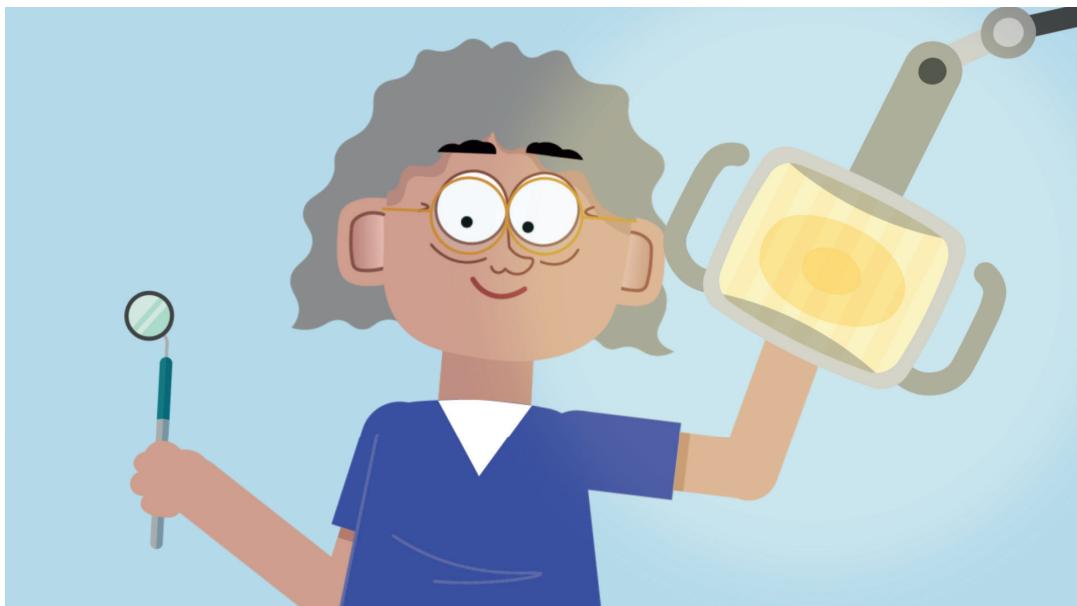

That's why **taking care** when **cleaning** our teeth is so important.
But if you have any problems, your **dentist** is here to help!

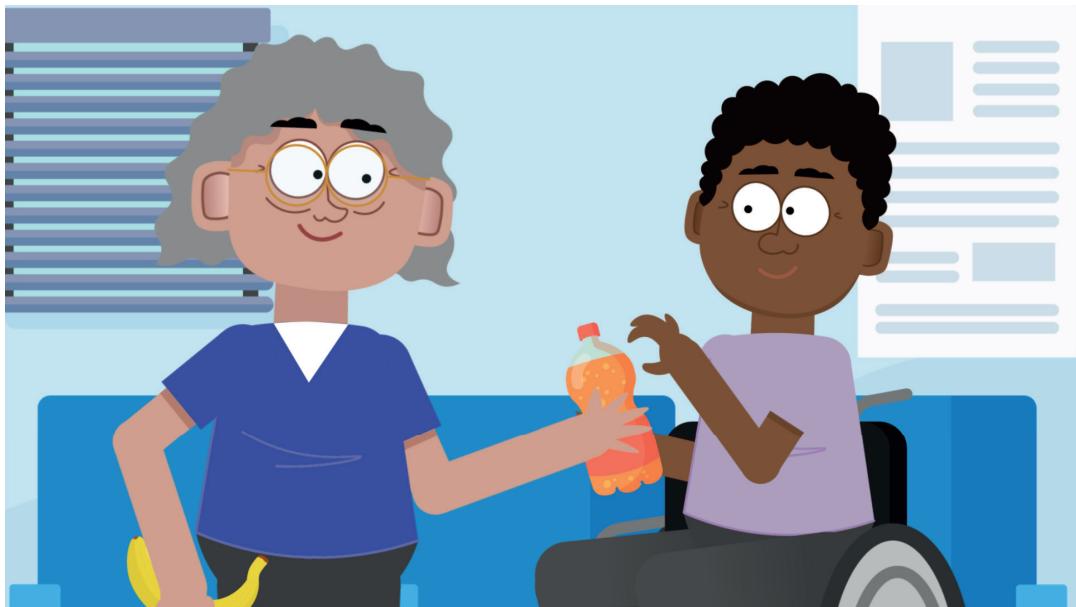

They will look into your **mouth** then **examine** and **inspect** your **teeth** and **gums** for any problems.

They might use a special **light** and **reflective mirror** to make sure they can see all around your **mouth**.

Food and drinks with a lot of **sugar** can damage our teeth.

So it's important we look after our **dental hygiene**

To keep our mouths in tip-top **chomping** condition.
