

Adult Guidance

Cut out and attach a paper clip to each of the ducks. Place the ducks in a container or scatter on a table. In groups, the children take turns to use a magnet to obtain a duck that will have a four-digit number written on it. They read out the four-digit number to the group before finding 1000 more or less than the given number. Children can be supported through the use of number lines, place value flip charts and base ten blocks.
