

# How humans change

Match the stage of the human lifecycle to its description.  
You could match them together or cut them out and draw a picture.

Foetus

A baby is growing inside its mother's womb.

Adolescence

Your body is fully developed and can have a baby.

Childhood

A baby is born after spending nine months inside the womb.

Old age

The last stage in the lifecycle of a human.

Baby

The stage when children become teenagers. Here bodies developed during puberty.

Adult

At this stage, you learn to walk and talk.
