

Fractions Greater than 1

Lesson Guidance

Learning Outcomes and Glossary

Learning Objective

Your child will learn how to represent fractions that are greater than 1.

Learning

Video – Fractions Greater than 1

- The aim of this video tutorial is to show children how to represent fractions that are greater than 1. Laura shows how improper fractions can be represented using bar models, and how to convert them to whole numbers and fractions.
- Throughout the video, there are a number of questions for children to answer. You will need to pause the video at these points to allow children time to answer.
- Children could practise more examples by drawing their own part whole models and creating fractions which are greater than 1.

Practise

Worksheet

- There are three questions to complete which involve fractions greater than 1. The first two questions allow children to practise the skill, while the third question extends them as they have to problem solve and explain their answer.

Interactive Game

- Answer four questions in the interactive game to practise your reasoning skills when it comes to fractions greater than 1.
