Make a Ramadan lantern

Ramadan is a very important holy month when Muslims pray and do good deeds.

In some countries, people decorate their houses with colourful lanterns to represent light and hope.

You will need:

- a printer
- an A4 piece of thin card - a pair of safety scissors
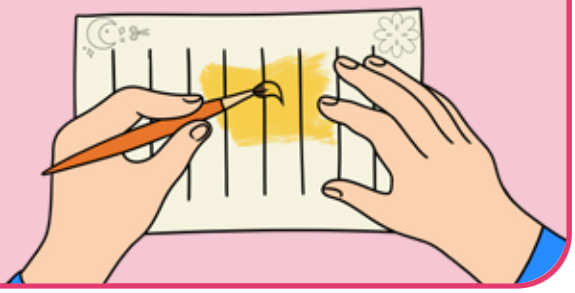
- a glue stick - some colouring pencils, felt tip pens or paint

Method:

1. Ask an adult to print out the lantern template onto a thin sheet of A4 card.

2. Colour in the lantern template and decorate it however you like. Colour some parts of it yellow or orange to show light.



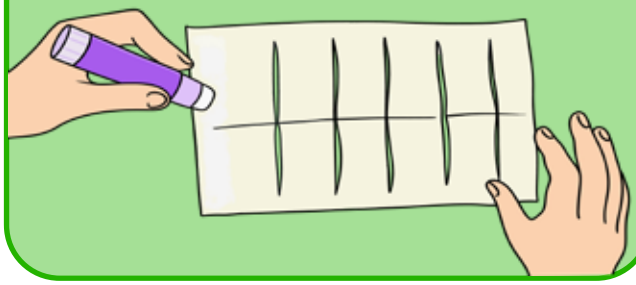
Next steps on page 2

Method:

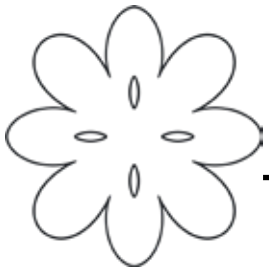
3 Fold the card in half lengthways.

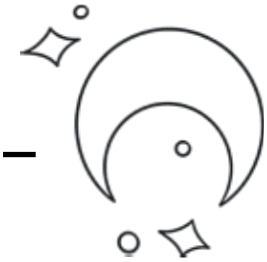
4 Ask an adult to help you to cut carefully along the dotted lines. Make sure you don't cut all the way to the edge.

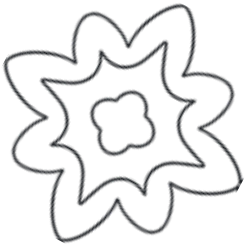
5 Unfold the piece of card. With the decoration face down, put glue along one of the shorter sides of the lantern.

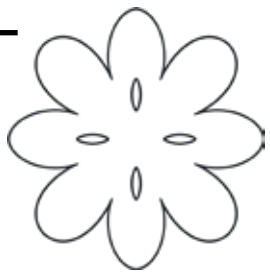


6 Roll the paper into a cylinder shape and press the edges together.

7 Take the small rectangle template and put glue at both ends.








8 Bend the rectangle and stick it to the top of the lantern to make a handle.
