

**In the springtime you can see lots of lambs playing in the fields.  
Very often they are born as twins.**

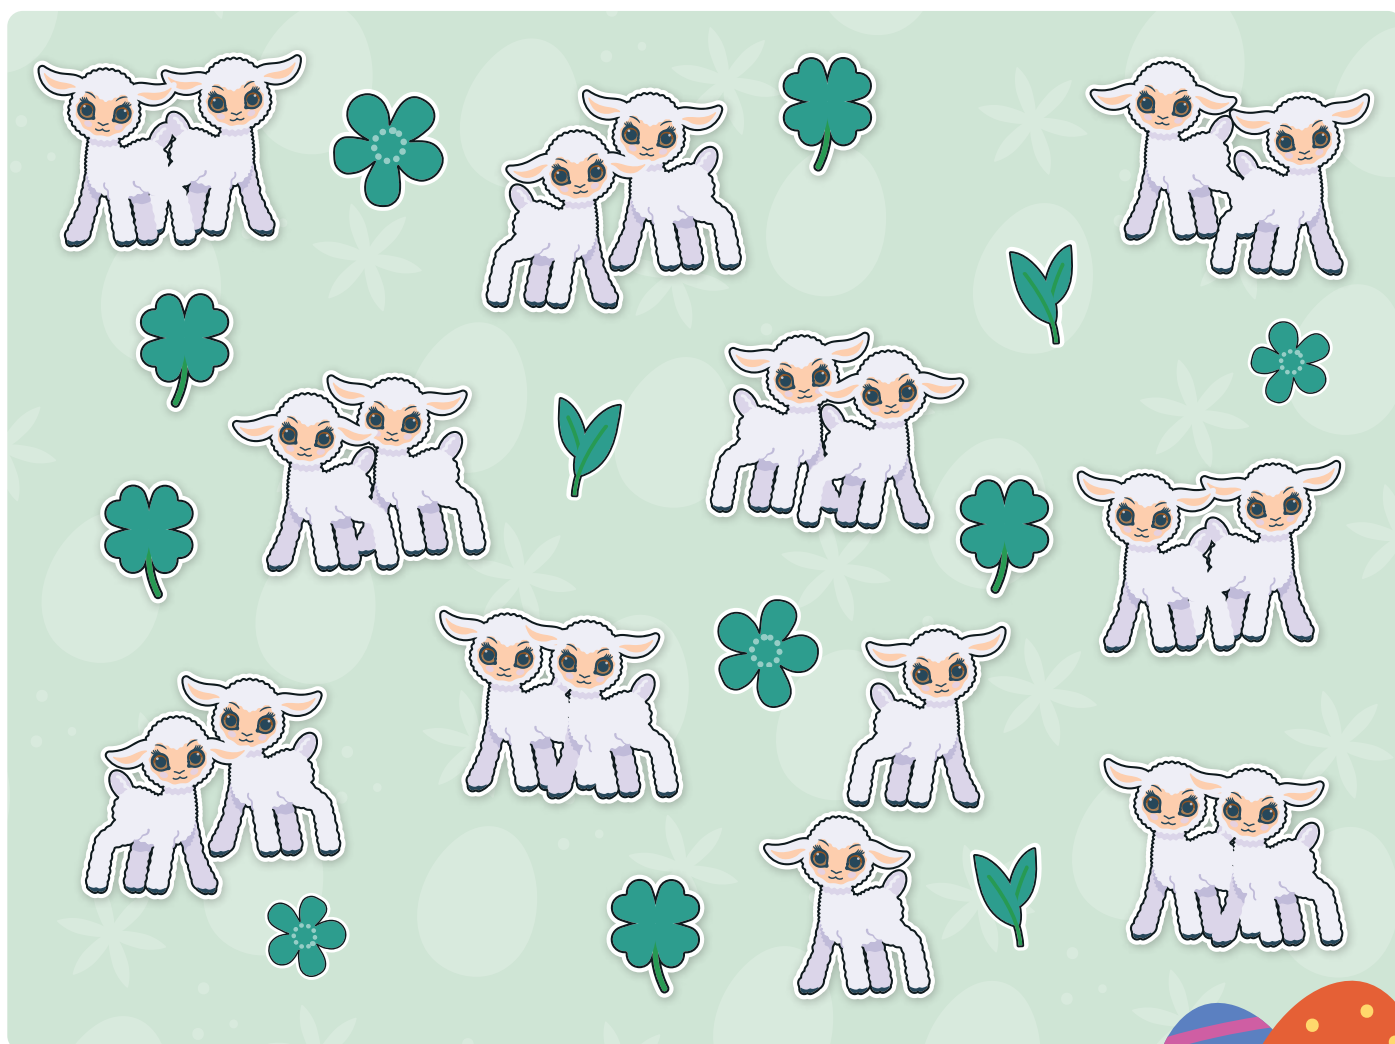

**1** How many pairs of lambs can you see in the field below?

As they get older lambs need to eat lots of plants, such as grass and clover. If you are lucky you can find clover plants that have 4 leaves.

**2** How many clover plants can you see in the field?

**3** Are there more lambs, or clover leaves in the field?

Farmers often colour their sheep and lambs so they can recognise them. Why not colour in the lambs in your favourite colours?
