

## Shopping

Hi, I'm Rafa. I have a problem.

I have a birthday party tonight.

I want to look good. Of course!

I usually buy clothes online. It's normally cheaper and there's more choice. I've bought a jacket.

It's arrived, but...

It's too small.

So I have to go to the shop to buy something.

Will you help me decide what to buy? Ok, let's go.

I like visiting shops to try on clothes.

But I don't like queuing!

Well, I'm looking for something.

How much does it cost? This jacket is on sale – it has 20 percent discount. Cool! It only costs 20 euros.

But I like the colour of this jumper more and it's cheaper than the jacket. It only costs 15 euros.

I also like these shoes and they're not expensive... they cost 9 euros!

And these glasses...

It's so hard to choose. I only have enough money for one thing because I bought tickets for a gig last week.

I'm going to try this one.

Again...

I think I need one size bigger to be more comfortable.

Does it suit me? Do you like it?

Right, I'm buying this one – it's my favourite. And, besides, it's the most comfortable. I love it.

## Shopping

Now I need to queue. What a nuisance!

Now, to pay. It's twenty euros. I thought I had two ten euro notes in my wallet, but it seems I don't. Ok, then I'm going to pay by card.

I have the receipt just in case there's a problem with the jacket. I hope not!

Great! I think it suits me. Thanks for helping me.

A selfie before the party?
