

## Personal statement

In my previous role with The Merry Men, I worked as a heroic outlaw specialising in riding through the glen. Our team's duties included stealing from the rich, giving to the poor, rescuing maidens, and various other projects.

Successfully pulling off our iconic exploits required teamwork, leadership, planning and organising. These are all skills I developed on the job in a high-pressure environment. I look forward to using these skills in future roles, perhaps in a cunning disguise.

I am currently looking to build on my experience in the forests of Nottingham by moving into the fields of motion pictures, animation, and novelty songs.
