

Let's plan a party!

Your challenge:

Imagine that you have to plan a birthday party. You have a budget of **£25**.

You can't spend more than this but you can spend less. Use the price list below and decide what food, drink and equipment you would like.

Using a separate sheet of paper, consider **how much** of the budget you have spent and explain **why** you made these choices.

There will be **5 people** coming to the party.
