

# Happy to help

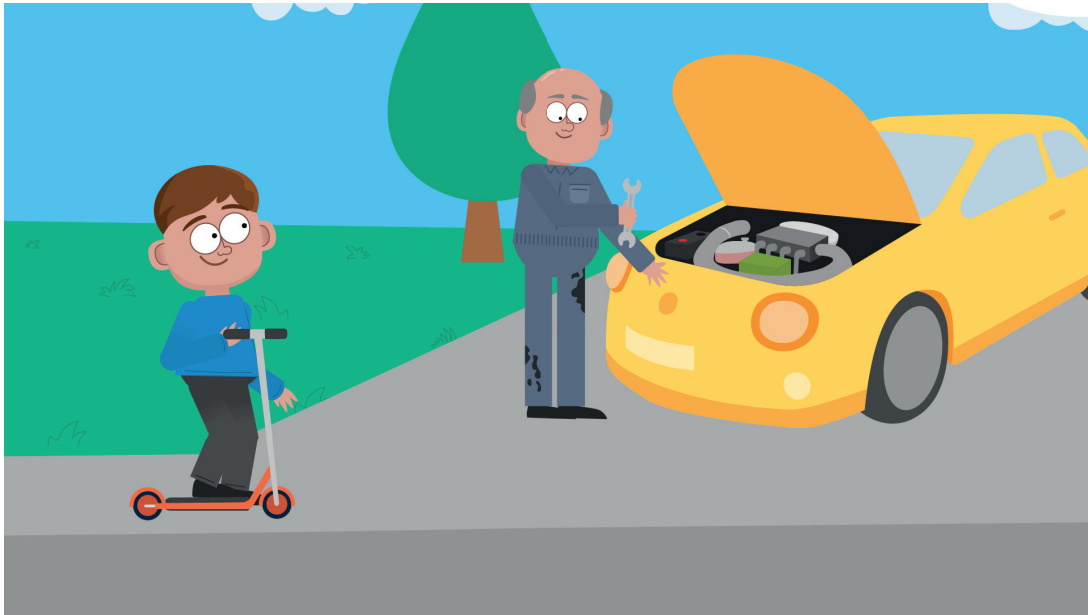

People who help us are everywhere. Some people **assist** us do things we find **difficult**.

You were **reminded** and helped by a grownup to get ready for school.

The neighbour's car is broken, but there is a **mechanic** helping to fix it with a spanner.

They're assisting with special **skills**, that take a long time to learn.

Let's keep looking.

We need to cross the road, lets use the **crossing patrol**. The crossing patrol helps us to cross the road safely by stopping the traffic.

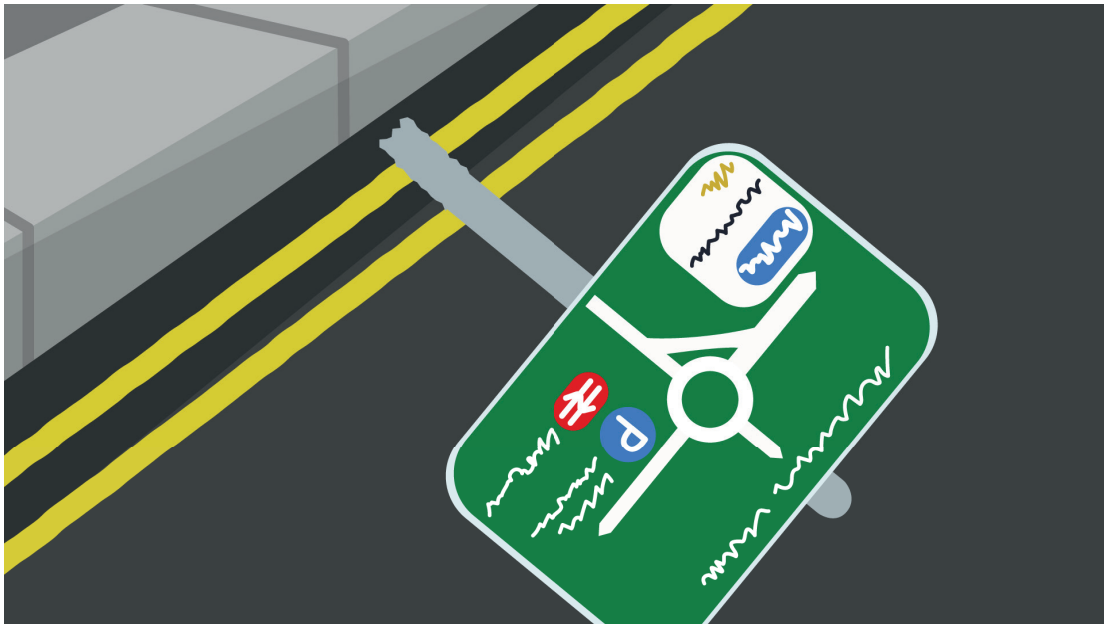

There's one of your friends waiting to go to the **dentist**. **Nurses**, **doctors** and **vets** are all important to keep everyone in our family fit and well.

Oh no! that sign has fallen in the road.

Thankfully the police are there to direct traffic and keep the drivers and **pedestrians** safe.

Nearly there. I see you're nervous about sports day. Sometimes support from our family, friends and teachers can help us with

Teachers can help us with anything we're unsure of or finding tricky at school.
